product description: Cable ladder is designed to create a cable route. It allows you to create horizontal, vertical and inclined routes.

The cable ladder consists of sidewalls and rungs, this design allows better cooling of cables.

Perforated sidewalls create the L-profile with a bended tag. Perforated rungs of the C-profile are attached to the sidewalls by riveting through in the distance of 300 mm with the open side of the profile upwards.

Connection of ladders is carried out using couplings INOXXS 110 (2 pcs) and using min. 16 pieces of screws NIXSM 6X10.
