product description: Angle couplings are mostly used at places where the route is slightly bended, for large bending radiuses or for the circumvention of columns and pillars.

The advantage of an angle coupling is that it makes it easy to create a break in a tray of almost any angle.

To fix the connection use the bolt NSM 6X10. To protect the cables, the bolt head is inside the cable tray.

Coupling and bolt with a GMT surface finish is used for a tray with an F surface finish.

These items can also be ordered in a varnished version

surface finish: S - Pre-Galvanized according to ČSN EN 10346, ČSN EN 10143, zinc-layer 15-27 µm

GMT - non electrolytic plating, aluminum-zinc-layer 5-15 µm (equivalent Hot Dip Galvanized)

sales amount: á 1 pc

meets the requirements: ČSN EN 61537:02

storage: ČSN EN 60721-3-1
